

Welcome, Class of 2016!

We're glad you'll soon be joining us on our beautiful Wellesley College campus! This is an exciting and wonderfully challenging time for you as you begin to explore all that Wellesley College offers. The Wellesley College Health Service is pleased to have the opportunity to help you get off to a healthy start!

To achieve that goal, it is essential that we receive information about your health. The Health Service Website for Incoming Students (<http://www.wellesley.edu/Health/Services/incoming.html>) provides detailed information and instructions for completing and submitting your health information both online and by mail. It is important to your health and required by the Wellesley College and Massachusetts law that you adhere to these requirements.

At the Health Service, we have a committed staff of nurses, nurse practitioners, a physician assistant and physicians that are available by appointment to help you take good care of yourself. Our on-site nutritionist and physical therapist are also available for consultation. We work closely with medical specialists at local hospitals and in the community. When necessary, we can help you facilitate consultations for complex problems and after-hours emergencies.

Once at Wellesley, when you need our services please don't hesitate to contact us at 781-283-2810. We are here from 8:30am – 5:00pm, Monday through Friday, with clinic appointments between 9:00am and 4:00pm and an evening clinic on Mondays until 7pm. There is also an on call clinician available after hours to assist with any urgent health needs.

We know you will enjoy Wellesley and look forward to helping you stay healthy!

Vanessa Britto, M.D., M.Sc.
Director, Wellesley College Health Service
